Software Development Experience

While working as a construction worker in late 2019, I was introduced to programming by researching online. I've always been curious about software but after taking classes online and creating a productivity app from scratch, I was officially hooked. Not only was it intellectually stimulating but it was the first time I found myself doing something I loved. Below is a link to my portfolio which contains live demos and code for projects that I've worked on.

HYPERLINK "<https://garrettvk.github.io/portfolio/>"<https://garrettvk.github.io/portfolio/>

Currently I have been creating web apps with html, css, javascript and react in addition to countless other technologies in the web development space. I believe this is my greatest strength but I also have experience with python, creating web scrapers, web automation and interfacing with apis. While studying in college I also gained experience writing code in Java.

Work Experience

General Construction at Greater Works Construction

7343 El Camino Real Atascadero, CA

June 2018 – Present

I have worked on projects such as: Interior and exterior painting, wall texturing, wood work such as building support beams for walls, staircase rail installation, nailing exterior trim and demolition. I have experience with power tools including: hand drills, handheld and table top saws, nail guns, air compressors, and drywall texture guns. My duties also include framing, electrical, plumbing, drywall, appliance installation and painting.

Machine Operator at Ernie Ball

San Luis Obispo

March 27th, 2017 – May 31st, 2018

During my time as a Machine Operator at Ernie Ball I was responsible for operating and maintaining CNC machines. This includes loading and checking programs, filling the machine with coolant and abiding by a routine cleaning schedule. Outside of machine operation my duties included, deburring parts, checking parts, packaging, communicating with separate departments and keeping my work area clean and organized.

Machine Operator at CNC Central

Atascadero, CA

August 2013 - March 2017

As a Machine Operator with CNC Central I programmed with Mastercam, setup machines and inspected parts. This includes experience with blueprint reading, CAD/CAM applications, DNC communications, tool length settings, deburring and inspection of precision machined parts.

7343 El Camino Real, Atascadero, CA 93422

Busser at The Loading Chute

Creston, CA

May 2013 - August 2013

While employed at the Loading Chute I ensured tables were ready to receive guests, cleaned and then reset once customers were finished. As a host I welcomed guests and kept track of open seating and server rotations. Other tasks included refilling drinks, serving bread, rolling silver wear and maintaining a clean restaurant.
